- Analyse video of interview with LinkedIn CEO talks about IA impact on jobs
<https://www.youtube.com/watch?v=ktpNFfpJ5rw>

The video features an interview with Ryan Roslansky, discussing how AI is reshaping the job market and what skills will matter in the near future. Contrary to popular belief, he explains that the current slowdown in hiring is not primarily caused by AI, but by broader economic factors like interest rates. At the same time, AI is creating entirely new categories of jobs rather than simply eliminating them.

He highlights several fast-growing roles, including data annotators (who train AI systems), data center professionals (who build infrastructure), and “forward deployed engineers” who translate AI into business solutions. These roles reflect a shift toward supporting and applying AI rather than competing against it.

A key message is that traditional career paths are becoming obsolete. Instead of fixed long-term plans, individuals should adopt “skill sprints,” continuously learning and adapting every few months. Skills required for jobs are rapidly changing and expected to evolve significantly by 2030.

The video also emphasizes the growing importance of “human skills” such as curiosity, creativity, and communication, which remain difficult to automate. Finally, personal branding—especially through platforms like LinkedIn—is becoming more important than formal credentials, as employers increasingly evaluate candidates based on their content and demonstrated skills.

reacts to your tone—escalating if you make excuses and softening only if you take full ownership and provide a clear recovery plan.

- Crisis Visualization:** Real-time "Crisis Level" indicator to keep the pressure high.
- Performance Evaluation:** End the simulation by typing "end roleplay" to receive a score and detailed feedback on your communication skills.

Technical Implementation:

- Frontend-First AI:** Integrated the @google/genai SDK directly into the React client following the latest security and performance guidelines.
- Model selection:** Uses gemini-3-flash-preview for low-latency, human-like dialogue.
- Polished UI:** Built with Tailwind CSS and Framer Motion for a professional, high-fidelity corporate aesthetic.

You can now start the simulation to see if you can salvage the relationship with Mr. Henderson. Good luck—he's not in a patient mood!

Mr. Henderson

CRISIS LEVEL: HIGH

We're already past the deadline and I'm still seeing nothing in my inbox. What exactly is going on over there?

13:42

i am sorry, we have to extend the deadline. initial estimates were wrong

13:44

That's a pretty weak excuse to give me on the day of the deadline. How much more time are we talking about, and why wasn't this flagged sooner?

13:44

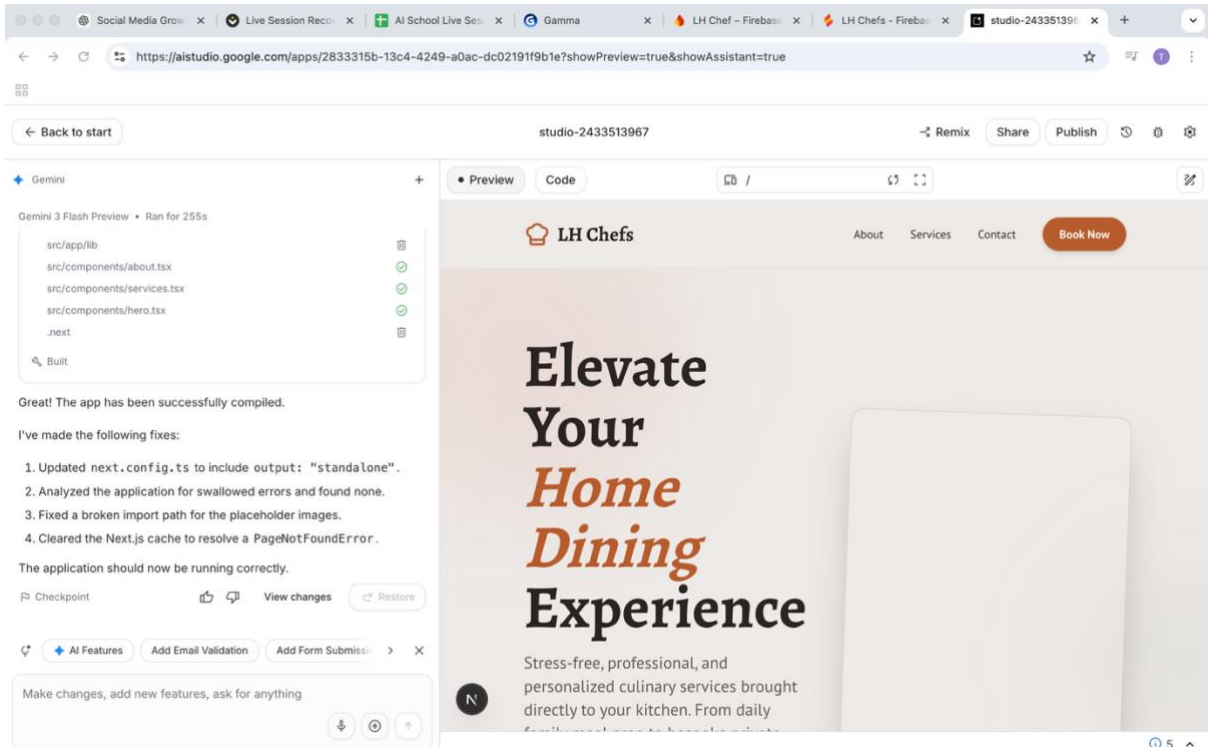

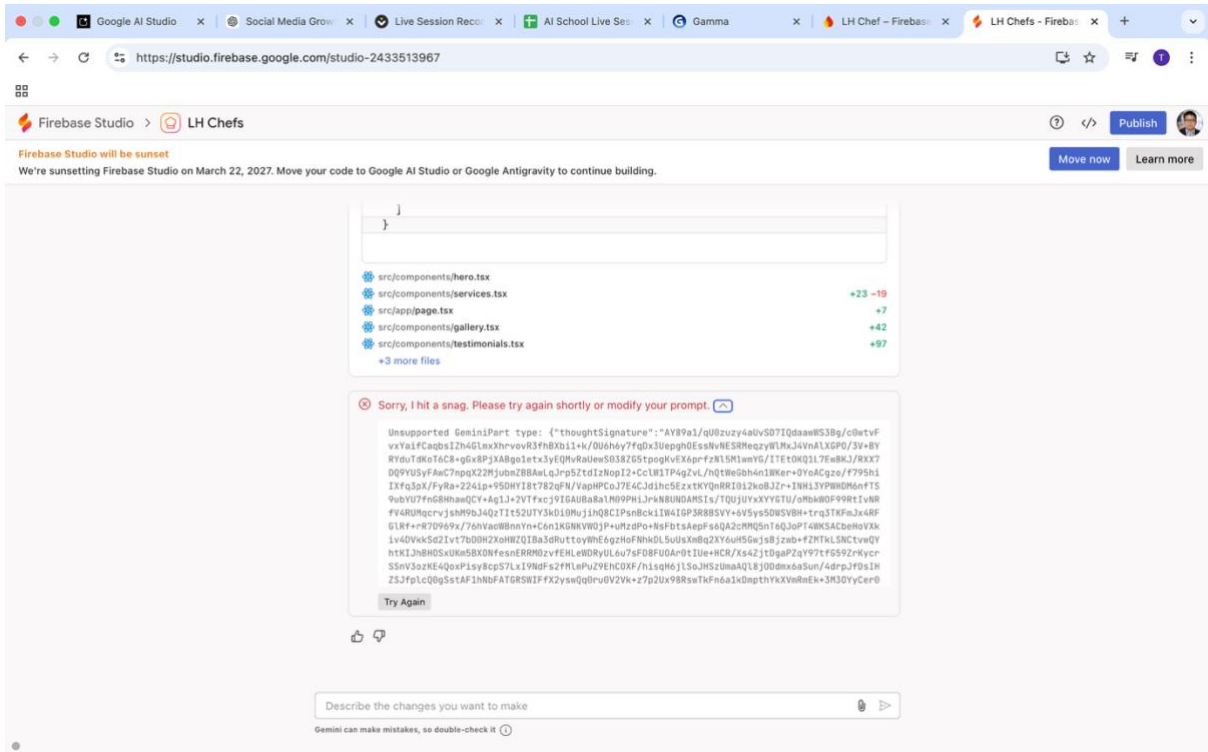

it was flagged but we wanted to meet the deadline by breaking up the project into two phases
